

Playgrounds

Play and Spaces

Difference between gamespace and playspace

Gamespace -> sports, courts
**Playspace -> tension between appropriation and
resistance**

Playgrounds: designed behaviors through Props (unlike games
-> mechanics)

Behaviors -> encounters -> Props that can become other
things

Transformation and appropriation

**Playground as replica of the world open for
appropriation: sensory stimulation**

Playground design:

control

flow

Children as designers: making props out of the world

- > adults?
- > panopticon playground
- > space for performance
